SPECIAL ISSUE:
TRANSPORT BILEVEL PROGRAMMING PROBLEMS:
RECENT METHODOLOGICAL ADVANCES

Guest editorial
H. Yang and **M.G.H. Bell** 1 Transport bilevel programming problems: recent methodological advances

T.L. Friesz and **S. Shah** 5 An overview of nontraditional formulations of static and dynamic equilibrium network design

M.J. Maher, X. Zhang and **D. Van Vliet** 23 A bi-level programming approach for trip matrix estimation and traffic control problems with stochastic user equilibrium link flows

J. Clegg, M. Smith, Y. Xiang and **R. Yarrow** 41 Bilevel programming applied to optimising urban transportation

J. Clegg and **M.J. Smith** 71 Cone projection versus half-space projection for the bilevel optimisation of transportation networks

Q. Meng, H. Yang and **M.G.H. Bell** 83 An equivalent continuously differentiable model and a locally convergent algorithm for the continuous network design problem

Number 2

D.H. Mitchell and **J. MacGregor Smith** 107 Topological network design of pedestrian networks

M.B. Gonçalves and **J.E. Souza de Cursi** 137 Parameter estimation in a trip distribution model by random perturbation of a descent method

S.C. Wong, C. Yang and **H.K. Lo** 163 A path-based traffic assignment algorithm based on the TRANSYT traffic model

D. Helbing, A. Hennecke, V. Shvetsov and **M. Treiber** 183 MASTER: macroscopic traffic simulation based on a gas-kinetic, non-local traffic model

J. de Dios Ortúzar 213 On the development of the nested logit model

Number 3

H.D. Sherali and **T. Park** 217 Estimation of dynamic origin–destination trip tables for a general network

J.L. Evans, L. Elefteriadou and **N. Gautam** 237 Probability of breakdown at freeway merges using Markov chains

K.M. Kockelman	255	A model for time- and budget-constrained activity demand analysis
T. Huisman and **R.J. Boucherie**	271	Running times on railway sections with heterogeneous train traffic
V.J. Blue and J.L. Adler	293	Cellular automata microsimulation for modeling bi-directional pedestrian walkways
	313	Erratum
	315	Forthcoming Papers

Number 4

S.P. Hoogendoorn and **P.H.L. Bovy**	317	Generic gas-kinetic traffic systems modeling with applications to vehicular traffic flow
H.M. Zhang	337	A finite difference approximation of a non-equilibrium traffic flow model
J.M. del Castillo	367	Propagation of perturbations in dense traffic flow: a model and its implications
T. Blayac and **A. Causse**	391	Value of travel time: a theoretical legitimization of some nonlinear representative utility in discrete choice models
A. Imai, E. Nishimura and **S. Papadimitriou**	401	The dynamic berth allocation problem for a container port
	419	Erratum
	421	Forthcoming Papers

Number 5

Y. Lee and **J.-F. Cheng**	423	A model for calculating optimal vertical alignments of interchanges
J.L. Adler and **M. Cetin**	447	A direct redistribution model of congestion pricing
M. Kuwahara and **T. Akamatsu**	461	Dynamic user optimal assignment with physical queues for a many-to-many OD pattern
W.W. Recker	481	A bridge between travel demand modeling and activity-based travel analysis
P.-S. You	507	Airline seat management with rejection-for-possible-upgrade decision

Number 6

C.-C. Lin	525	The freight routing problem of time-definite freight delivery common carriers
W.H.K. Lam and **Y. Yin**	549	An activity-based time-dependent traffic assignment model

J.-B. Sheu, Y.-H. Chou and L.-J. Shen 575 A stochastic estimation approach to real-time prediction of incident effects on freeway traffic congestion

N. Wu 593 A universal procedure for capacity determination at unsignalized (priority-controlled) intersections

625 Forthcoming papers

Number 7

C.-H. Wen and F.S. Koppelman 627 The generalized nested logit model

J. Swait 643 Choice set generation within the generalized extreme value family of discrete choice models

M.L. Hazelton 667 Inference for origin–destination matrices: estimation, prediction and reconstruction

C.R. Bhat 677 Quasi-random maximum simulated likelihood estimation of the mixed multinomial logit model

J.-B. Sheu and S.G. Ritchie 695 Stochastic modeling and real-time prediction of vehicular lane-changing behavior

Number 8

A. Daly 717 Alternative tree logit models: comments on a paper of Koppelman and Wen

F.S. Koppelman, V. Sethi and C.-h. Wen 725 Alternative nested logit models: a response to comments by Andrew Daly on an earlier paper of Frank Koppelman and Chieh-hua Wen

D. Zhang, A. Nagurney and J. Wu 731 On the equivalence between stationary link flow patterns and traffic network equilibria

L. Fu 749 An adaptive routing algorithm for in-vehicle route guidance systems with real-time information

J.-F. Cordeau, G. Desaulniers, N. Lingaya, F. Soumis and J. Desrosiers 767 Simultaneous locomotive and car assignment at VIA Rail Canada

A. de Palma and R. Lindsey 789 Optimal timetables for public transportation

815 Acknowledgements

817 Forthcoming Papers

Number 9

K.I. Wong, S.C. Wong and H. Yang 819 Modeling urban taxi services in congested road networks with elastic demand

F. Qiao, H. Yang and W.H.K. Lam 843 Intelligent simulation and prediction of traffic flow dispersion

J.-H. Park, A. Zhang and Y. Zhang 865 Analytical models of international alliances in the airline industry

Number 10

R.-C. Jou 887 Modeling the impact of pre-trip information on commuter departure time and route choice

J. Swait 903 A non-compensatory choice model incorporating attribute cutoffs

H.M. Zhang 929 A note on highway capacity

I Forthcoming Papers

III Volume Contents and Author Index
